**ATTENTION:** Small appliances, batteries, vegetable oil, expired medicines: give them in the collection center that will be set up near the municipal warehouse of Guardistallo from 2021.

#### INFORMATION RELEVANT FOR COLLECTION:

**For a correct exposure:** the bags must be exposed well closed and always delivered inside the container, where required. It is recommended to crush well the waste to reduce the size and not to fill the bag to the brim.

**Problems to expose on the planned day:** the container/bag must be displayed on the first day of the calendar, or you can go to the collection centre near the municipal warehouse of Guardistallo.

For the extra delivery of diapers and adult diapers in the central squares will be placed appropriate cover boxes.

**Non-conformity of the waste:** the operator may not remove the material and affix to the bag/container a special stamp stating the reason for not removing it.

#### Possible examples of errors:

- wrong day and wrong time of exposure: the waste will not be withdrawn by operator; the user has to exposed the waste on the first useful day by calendar.
- bag not suitable (not Rea): transfer the waste to the right bag provided by Rea and expose it on the first day from calendar (no black bags).
- presence of non-compliant materials in the bag: remove the foreign waste from the bag, place it in the right bag and display it on the first calendar day.
